ARG COMMUNICATIONS

Hello Anthony,

I wanted to take a minute to thank you and your team for the innovative design you guys came up with for our service drive thru. The system has performed as we had hoped. Being able to easily identify damage even as small as chips on a windshield has saved us thousands of dollars. When you can prove damage was on the car when they drove it in, it makes it easy to refute unwarranted claims. It is true that "a video is worth a thousand words". With a drive thru that sees more than a 100 vehicles every day, we really needed a robust system. We've already avoided more than 25 damage claims in the first six months of operation. I really appreciated the flexibility you guys showed in tuning the cameras so we could see everything we needed to. You guys were outstanding as you brought the ideas we brainstormed into a reality for us. We couldn't be more pleased with the product or its implementation.

Thank You,  
Dave Jernegan
